HISTORICAL & 3-YEAR PROJECTED FINANCIAL STATEMENT (2026 – 2028)

Currency: USD ($) | Target Market: Qatar, GCC & West Africa | Prepared for Qatar Startup Program

---

EXECUTIVE SUMMARY & UNIT ECONOMICS

PetroOne monetizes via a high-margin enterprise SaaS model billed per active drilling rig ($18,000/rig/month average contract value) and multi-asset enterprise licenses ($350,000 – $600,000/year for national oil companies). With cloud telemetry processing and reusable algorithmic modules, gross software margins exceed 82%. Break-even is achieved in Year 2 at 18 active monitored rigs.

STRATEGIC ASSUMPTIONS & USE OF FUNDS

• **Contract Pricing:** Base rig rate calculated at $18,000/rig/month; enterprise multi-well NOC licenses range from $250k–$600k/yr.
• **Target Deployment:** Initial 6 rigs deployed across Qatari offshore gas wells and West African independent operators.
• **Use of Seed Capital ($500k – $1M target):** 50% for core Qatari engineering & downhole physics hires; 30% for local business development & QatarEnergy/QSTP pilot testing; 20% for WITSML streaming server infrastructure & compliance.
